

Newly revised for 2010 is the 'Pervious Concrete Contractor's Certification' text reference. This text reference serves as the content for the NRMCA Pervious Contractor Certification program. It includes information on What the Concrete Craftsman needs to know about Pervious Concrete; Pervious Concrete Mixtures and Production; Tools and Equipment; General Design Principles; Pervious Concrete Construction; and Maintenance and Troubleshooting. Significant revisions were made in August 2010 to update the content to current practice and to include suggested checklists for all involved. Review questions are included to support the certification exam. The text was developed by support from the RMC Research & Education Foundation.
