

2010 NRMCA Safety Contest Executive Summary

The National Ready Mixed Concrete Association (NRMCA) Safety Contest has for years been a safety performance and incentive/award program aimed to foster safe practices at ready mixed concrete plants across the nation. In November 2008, the NRMCA Safety Task Group updated the “Excellence in Safety” award to a 3-tier system and began basing the winning facilities off of the latest OSHA / Bureau of Labor Statistics (BLS) Incident Rate available for the ready mixed concrete industry. Starting in 2009 only those plants with an incident rate below the national average will receive awards. The latest BLS data (as of June 1, 2010) shows the ready mixed concrete industry with an incident rate of 5.2. Using the model of the Olympic Games, the 3-tiers of “Excellence in Safety Awards” were broken down into Gold, Silver and Bronze:

Gold – Incident rate equal to zero

Silver – Incident rate greater than zero and equal to or less than 2.6 (1/2 the industry average)

Bronze – Incident rate greater than 2.6 and less than 5.2

Over the past few years the program has grown to become NRMCA’s most popular award recognition program. The NRMCA Safety Contest and NRMCA Safety Benchmarking Program entry forms were combined and computerized to enhance both programs. The data are analyzed and used to establish industry benchmarks for safe operations. Concrete Producer Magazine cosponsors the NRMCA Safety Contest.

The 2010 NRMCA Safety Contest received 1219 individual plant entries. All entries included safety records from calendar year 2009. NRMCA has estimated that there are currently 6000 – 7000 plants in the United States. The largest category for plants was Gold with 873 Excellence in Safety awards. The Silver category had 5 Excellence in Safety Awards. The Bronze category had 43 awards. The total number of plants receiving “*Excellence in Safety*” awards in 2010 is 921.

Analyses and Trends

Since the safety contest began in 1996 more than 14,000 plants have entered, and many of these entered the contest every year since 1996. Total cubic yards continue to be measured, with 42,076,766 reported by participating companies this year. There were 171 lost-time accidents reported by companies in 2009 contest, and there were 89 mixer truck accidents.

	1996	1997	1998	1999	2000	2001	2002
