SAFETY ALERT

This picture is not the actual employee or occurrence. It is a reenactment of what occurred.

Date of incident:	XXXXX	**Time of incident:**	XXXXX
Date of lost time: *(if applicable)*	--	**Category of incident:** *(place an X on all that apply)*	X Injury __ Roll-over __ Other

Description:

On XXXXX a driver was turning the chute lock on his truck to the proper position while holding the chute lock down. When he released the chute lock his finger was caught in it resulting in an avulsion to the tip of his left hand pinky finger.

There was no lost time but the employee was on restricted duty for nine working days. There was a proper completed Safety Task Assessment (STA) for the day's activities.

All drivers should use extreme caution around all pinch points and follow proper procedures for this and other activities.
