SAFETY ALERT

This picture is not the actual employee or occurrence. It is a reenactment of what occurred.

Date of incident:	XXXXX	**Time of incident:**	XXXXX
Date of lost time: *(if applicable)*	XXXXX	**Category of incident:** *(place an X on all that apply)*	X Injury ___ Roll-over ___ Other

Description:

A truck driver fell off of the truck ladder (approx. 6 ft.) while carrying a 41 lb. chemical container. He suffered a broken right arm, broken left collarbone, fractured left eye socket, an injured shoulder, a laceration to his head, and an internal head injury.

A general Safety Task Assessment (STA) sheet was prepared for the day but adding these chemicals at the plant was not routine and a Non Routine STA should have been completed. The driver did not maintain 3 points of contact as instructed in driver training and the proper method of adding the chemicals was not followed.

All drivers must follow proper procedures when climbing ladders and at all times maintain 3 points on contact……
